- About Dotdunia Technologies

A small team with a long track record.

Dotdunia started in Hyderabad in 2010. Every website name has a dot in it, and dunia means world, so the name says what we do: we connect the pieces a business needs online.

We design and build websites, apps and business systems for companies in India, the Middle East, the UK and beyond, from small clinics to large industrial companies.

Australia

150+ projects delivered

50+ clients worldwide

16+ years, since 2010

In-house core team for planning, design, development and quality control, with a remote specialist network and trusted partners when a project needs them.

- Services

One team. Everything connected.

A website leads to a store, the store needs smarter search, the leads need follow-up, and it all needs looking after. We do all of it.

Websites & E-commerce

Business sites, online stores, pharmacy and clinic websites that load fast and bring in enquiries.

AI search

Recommendations

Website assistants

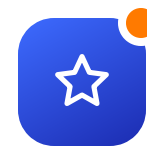

Apps & Digital Products

From a quick MVP to a full platform: web apps, Android and cross-platform apps, dashboards and portals.

AI features

Smart workflows

Rapid prototyping

UI/UX & Brand Design

Research, wireframes, Figma prototypes, logos, brand kits, print and packaging, designed around real users.

Faster exploration

Quicker prototypes

AI & Automation

Assistants, automation and integrations that take routine work off your team and connect your tools.

Assistants

Workflow automation

Integrations

Digital Growth & Support

SEO, ads, social media and monthly website care, so everything keeps working and growing after launch.

SEO workflows

Analytics reports

Also: website and social media maintenance, IT training, job support and IT consulting.

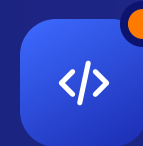

- AI-first, never AI-only

AI is now part of everything we build.

Not as an add-on, but in practical places where it cuts repetitive work, improves the customer experience and connects the tools you already use.

People decide what is worth building. AI helps us explore, design, write code and test more in less time.

Build

AI-enabled websites, apps, MVPs and digital products, with the smart parts designed in from day one.

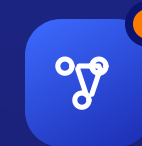

Automate

Less repetitive work. We connect everyday workflows so routine jobs run on their own.

Assist

Assistants that help your customers, your team and your support desk get answers faster.

Connect

Your website, CRM, payments, analytics, WhatsApp and other systems working together.

- Our process

AI speeds up the work. People give it direction.

The same disciplined product process on every project. Strategy, UX, architecture, testing and final decisions stay with experienced people.

1

Human insight

Understand

Your business, your customers and the problem worth solving.

2

AI-assisted

Explore

AI helps us test more ideas and directions, faster.

3

Human-led

Design

The idea becomes something clear you can see and approve.

4

AI-assisted

Build

Our developers build it, with AI speeding up routine parts.

5

Integrations

Connect

Website, CRM, payments, WhatsApp and data working as one.

6

Human-checked

Test

Real devices, real browsers and a human review before launch.

7

Deployment

Launch

Hosting, deployment and the details of going live.

8

Ongoing

Improve

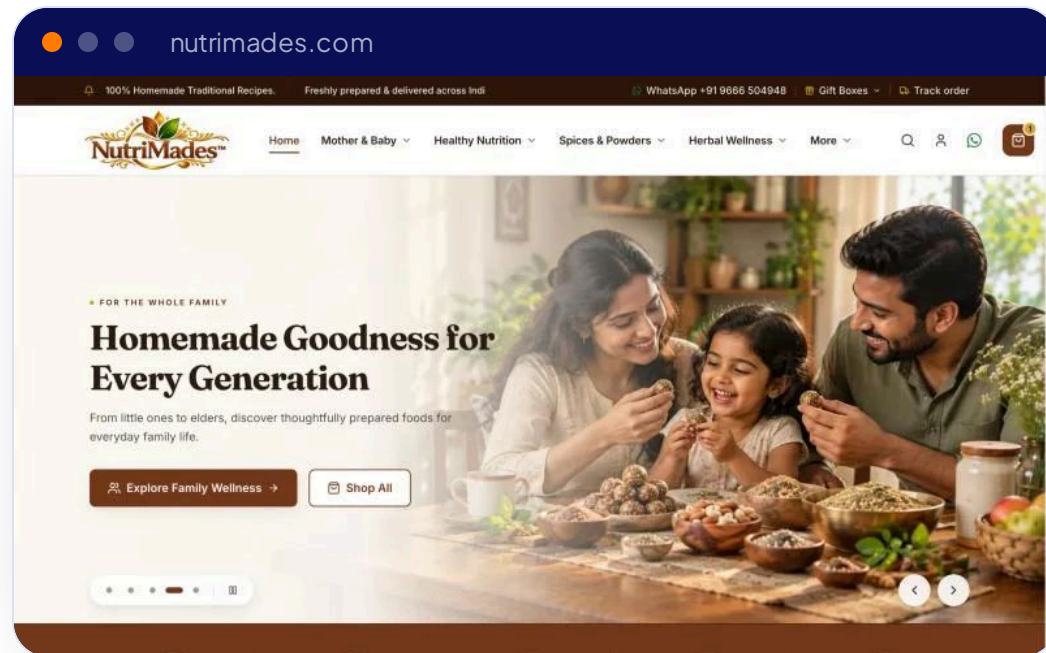

We watch what people do and keep improving it.

- Why Dotdunia

Why businesses work with us.

150+ projects
50+ clients
16+ years

- ✓ We start by understanding the business problem.
- ✓ We design before we build, so you see it first.
- ✓ We use AI where it saves time or money, not for show.
- ✓ We connect your systems instead of adding another island.
- ✓ One team from first idea to launch and support.
- ✓ We stay involved after launch, month after month.

“ Dotdunia Technologies played a key role in improving our website experience and simplifying our ordering process. Their understanding of user behavior and ability to implement practical solutions made a real difference to our business.

Team Central Books · Central Books, India

“ Working with Dotdunia Technologies was a smooth and professional experience. Their team understood our requirements clearly and delivered a high-quality solution that exceeded expectations. The attention to detail and commitment to timelines were impressive. Highly recommended for any business looking for reliable IT services.

Operations Manager · Industrial Client, Saudi Arabia

“ Dotdunia stands out for their structured process and technical expertise. They handled our project with professionalism from start to finish, ensuring everything was delivered on time and with high quality. A trusted technology partner.

Project Manager · Corporate Client, Middle East
